Keynote Address:

The Ebb and Flow of Juvenile Justice in America

Over the past 20 years we have seen extreme changes in the philosophical underpinnings of the juvenile justice systems across the country. This swing of the pendulum is not new to us, but in the past we made our case for a more appropriate, proportionate and consistent response to juvenile offending without the strong research that now exists in support of this position. Our Keynote Speaker, Shay Bilchik, will address our ability to use this research to create and sustain this more effective response to juvenile crime, and the policy, practice and leadership implications related to these efforts. He will explore these issues from both a developmental and multi-system perspective, focusing on the use of data, the reengineering of how we structure our work, and the need to partner in the development of family and community resources in reducing recidivism and achieving better outcomes for our system involved youth.

Plenary Session Speakers
